

July 29, 2020

To our shared communities,

This is a very difficult letter for us as school leaders to write and one we know will be difficult for our families to read. Since March, Gavin School District 37, Big Hollow School District 38, Fox Lake Grade School District 114, and Grant Community High School District 124 have been collaboratively developing learning options for the opening of the 2020/2021 school year. After months of extensive planning with community stakeholders, we presented to our shared communities options for blended/hybrid learning and fully remote learning. These plans were crafted with a clear focus on learning and developed in good faith and in accordance with local, state and federal guidelines provided to schools in June, 2020.

What has been a significant challenge for districts is the continual change to those guidelines, which are truly the foundation of our planning efforts. New guidance was released on July 23, well after our hybrid/blended learning plans were complete. Changes continue to be made on a daily basis by local and state officials and we are aiming to comply with a benchmark that continues to move. Specifically, the following are challenges that each of our districts have had to consider:

- Guidance on 6' of social distancing changed significantly from what was advised on 6/23/20. The Lake County Health Department clarified on 7/24/20 that if we are unable to maintain 6' of social distancing at all times within the building then alternate plans need to be developed.
- Quarantining guidelines from Centers for Disease Control, Illinois Department of Public Health and Lake County Health Department change on a daily basis. The current guidelines will result in significant disruption daily. Quarantine is required for anyone that has been in close contact with an infected individual. Close contact is currently defined as within 6' for 15 minutes or more, of which the time is cumulative throughout the school day.
- Additionally, new guidance was provided on 7/24/20 that any student or staff member that exhibits a COVID-19 like symptom must be sent home immediately. They are required to either quarantine, provide a negative COVID test, or a physician's note to

return to school. This will be a significant challenge as the list of COVID-19 like symptoms includes symptoms of other common illnesses, i.e. runny nose, cough, sore throat.

- Illinois State Board of Education and Centers for Disease Control are now recommending all students be placed in strict cohorts to minimize potential illness and contact tracing requirements. Although this would impact each grade level differently, it is not possible to effectively implement all current educational opportunities in a strict cohort format.
- The required daily screening of students continues to be a challenge that we are trying to address. Students may not enter the building or a bus if they have not completed the self-health check. Identifying who has or has not completed the screening at the point of entry is difficult. The process to then complete an individual screening and temperature check for those that have not completed the process is time consuming and complex, especially as it relates to children standing at bus stops.
- The Lake County Health Department advised on 7/24/20 that they are recommending a 14 day quarantine for individuals that have traveled to areas with widespread community transmission. With staff and families traveling and commuting from areas identified, this may impact both student and staff attendance.
- We were advised on 7/24/20 that more restrictive bus guidelines are forthcoming. Stricter guidelines will continue to negatively impact our ability to transport students to school in an efficient and timely manner.
- There are increasing rates of infection in Lake County, which has resulted in the county being moved to a “warning” status. We are reviewing those metrics with the Lake County Health Department on a weekly basis. Lake County Health Department stated on 7/24/20 that there will undoubtedly be cases in our schools and significant portions of our staff and students impacted.

While our districts, curriculums and communities are unique, we are similar in our goal to provide excellent educational opportunities while keeping students and staff safe. Ensuring that safety, given the continually changing guidance, has proved challenging at best.

After much deliberation, we are profoundly disappointed to announce that we will not be able to begin the school year in-person as we had planned. The difficult decision has been made to begin the year in fully remote learning, with the goal to begin phasing back in in-person learning

as soon as it is safe to do so. We will provide our communities with a status update on or before September 30, 2020. As our districts are unique with grade levels served and the structure of teaching and learning, we look forward to communicating our detailed plans with our respective districts in the coming days.

Collectively, we remain committed to providing a quality educational experience for our students while paying close attention to the social-emotional needs of students as we continue in a remote learning environment. The strength of our districts is a direct reflection of the strength of our communities. We continue to appreciate your patience, flexibility and support as we navigate these difficult times together.

Sincerely,

Christine A. Sefcik, Ed.D. Superintendent Grant Community High School District 124

Julie A. Brua, Ed.D. Superintendent Gavin School District 37

Heather Friziellie, Ed.S. Superintendent Fox Lake School District 114

Bob Gold, Superintendent, Big Hollow School District 38
